Election/Restriction

A restriction requirement was made in accordance with the Interview Summary Form that accompanies this Office action. However, in view of the finding of allowability with respect to the catalyst composition claims, that requirement is hereby withdrawn. Therefore, claims 22-25 are rejoined and form the basis for the rejections set forth herein below.

Specification

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, **if any**, should be updated in a timely manner.

Claim Rejections - 35 USC § 112/101

Claims 22-25 provide for the use of a lithium phosphate catalyst containing boron and sodium but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass.

A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 22-25 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966). Although the claim does not contain the word "use", any active process step is absent so the claim effectively contains no more information than a "use" claim.

Allowable Subject Matter

Claims 1-21 are allowable over the prior art of record. The prior art fails to teach or suggest a catalyst composition comprising lithium phosphate and effective amounts of boron and sodium. The prior art also fails to teach the method for producing this composition.

Conclusion

Applicants are advised that any evidence to be provided under 37 CFR 1.131 or 1.132 and any amendments to the claims and specification should be submitted prior to final rejection to be considered timely. It is anticipated that the next office action will be a final rejection.
